DR1-198: Self-Emulsifying Cleansing Oil

Ingredient	INCI	Supplier	W/W%
Phase A (Oil)			
Trivent OC-16	Cetyl Ethylhexanoate	Alzo International	20
Dermol DCC	Dicaprylyl Carbonate	Alzo International	20
Elefac I-205	Octyldodecyl Neopentanoate	Alzo International	10
Bernel Ester 185	Isostearyl Neopentanoate	Alzo International	10
Wickenol 160	Ethylhexyl Pelargonate	Alzo International	10
Hetester PHA	Propylene Glycol Isoceteth-3 Acetate	Alzo International	15
Hetester PCA	Propylene Glycol Ceteth-3 Acetate	Alzo International	15
Total			100.00

Manufacturing Procedure:

- 1) Combine all ingredients and mix until homogenous

Alzo Ingredient Benefits:

Elefac I-205 – ester with great spreadability; Very “wet” application with a lightweight afterfeel. Excellent organic sunscreen solubilizer and TiO₂ & ZnO pigment wetter

Hetester PCA – self-emulsifying emollient that can be added to oil-based cleansers to form a milky emulsion when water is splashed with water

Trivent OC-16 – medium viscosity ester with excellent application properties and a velvety skin feel
